

LEADING IN A TECHNOLOGY ORGANIZATION

Future-Proof Your IT Leaders

Technology is a key underpinning to the way we conduct every aspect of business. Today's successful IT professionals transcend technical expertise and become strategic business partners who drive tangible business results. When IT professionals learn to inspire and motivate teams, foster innovation, lead through ambiguity, and create positive workplace cultures, they elevate the performance of all areas of your business.

This highly interactive workshop, developed by IT leaders for IT leaders, gives IT professionals hands-on tools and practice to become more than a functional, technical leader. Participants develop the ability to become strategic business partners who foster positive workplace cultures and high-performing teams.

Who Should Attend

This workshop is designed for mid-level IT managers.

What You Will Learn

After participating in this program, you and your team will be able to:

- » Further your organization's digital agenda
- » Drive tangible business value and create revenue
- » Attract, retain, and develop key leaders
- » Turn talented individuals into high-performing teams
- » Change the culture and brand of the technology organization
- » Build board and C-level relationships
- » Communicate and market the value of the IT investment
- » Build strategic partnerships with key vendors
